**RF Technologies Achieves Premier Certification from Cisco in United States**

**Brookfield, Wis., July 21, 2009** – RF Technologies announced today it has achieved Premier Certification from Cisco®. To earn Premier Certification, RF Technologies had to meet standards for networking competency, service, support and customer satisfaction set forth by Cisco.

“We’re pleased to integrate Cisco’s high-caliber technology into our healthcare safety and security solutions,” stated Keith Koby, Executive Vice President. “Consistently leading the industry, RF Technologies provides advanced and sophisticated technology solutions to senior living communities, hospitals and related healthcare facilities.”

“Cisco is committed to providing tools, training and programs to help drive partner growth, differentiation and profitability,” said Surinder Brar, senior director of worldwide channels at Cisco. “By combining a Cisco Premier Certification and Cisco Express Foundation and Unified Communications Specializations with expertise in radio frequency identification monitoring systems, healthcare security solutions, and Wi-Fi real-time locating systems (RTLS), RF Technologies is making an investment in delivering the integrated and customized technology solutions today’s customers demand.”

As a Cisco Premier Certified Partner, RF Technologies demonstrates a range of technical expertise. To achieve Cisco Premier Certification, RF Technologies was required to achieve the Cisco Express Foundation Specialization. This specialization includes tests on technical competency in the integration of basic routing and switching, wireless LANs, and security technologies. In addition, RF Technologies was required to integrate a base level of Cisco Lifecycle Services into its offerings and demonstrate measurably high levels of customer satisfaction based on independently audited customer satisfaction surveys.

The Cisco Resale Channel Program provides partners with the training required to build sales, technical and Cisco Lifecycle Services skills. Cisco resale partner certifications—Select, Premier, Silver and Gold—represent an increasing breadth of skills across key technologies and a partner’s ability to deliver integrated networking solutions. Cisco resale partner specializations—Express, Advanced and Master—reflect an increasing depth of sales, technical and service expertise in particular technologies.

**About RF Technologies**

RF Technologies is a leading provider of comprehensive, integrated RFID Safety and Security systems, Wi-Fi RTLS systems, and healthcare enterprise solutions. With an installed base of more than 10,000 systems worldwide, RF Technologies specializes in state-of-the-art healthcare solutions for senior care facilities and hospitals, including

Code Alert® Wandering Management, Wireless Call and Fall Management Solutions, Safe Place® ED and Infant Security Solutions, and PinPoint® RTLS Location-Aware Solutions. The company is credited with inventing the first RFID infant security system, which was designed and developed by nurse clinicians. It was the first in the industry to invent Peer-to-Peer Wi-Fi RTLS, and to offer Remote Monitoring, RF Consulting and 24X7 technical support by RF Technologies' staff specialists and a nationwide service management team.
