

Code Alert® ICM Voice-to-Voice

- Hands-Free Communication
- Pendant, Pull Cord, Push Button Activated
- Reassures Resident Their Call Has Been Heard
- Caregiver Can Speak Remotely
- Resident Can be Heard From Nearest Room Phone
- Ascertain Priority of Call
- Staff-to-Staff Communication for Duress or Assistance Calls

Two-Way Resident/Caregiver Communications

Voice-to-voice communication is a foundation of Code Alert® Integrated Care Management (ICM). Via the ICM Infrastructure, staff is notified of an emergency call, an event, and associated responses. Caregivers can speak with residents immediately to ascertain the nature of the alert, and reassure them that help is on the way. ICM allows caregivers to assess and prioritize calls, improving staff efficiencies, response time, and level of care. Quick and easy access to Resident/Caregiver communication via a hands-free speakerphone provides peace of mind to residents, family members, and staff/administration.

Code Alert® and Cisco® Allow for Caregiver Mobility

RF Technologies has partnered with Cisco to provide Senior Care environments the efficiencies of mobile phone units and user-friendly central station/room units. Code Alert ICM "Alerts and Alarms" are displayed on either a handheld phone or wall phone, providing ease-of-use selection options including touchscreen and toggle features. Phones are available in a medical grade/watertight enclosure for appropriate cleaning.

First in the Industry to Utilize Wi-Fi Infrastructure

Code Alert ICM operates on a wireless mesh network that routes the data, location, and identity of the resident requesting assistance between signaling and receiving devices. The components of Code Alert ICM are standards-based on the IEEE 802.15.4 and ZigBee protocol for wireless personal area networks. The two-way voice communications operate on a Wi-Fi infrastructure. Code Alert ICM Solution is the first in the Industry to be based on Wi-Fi, enabling Senior Care communities to capitalize on existing Wi-Fi infrastructure.

For more information on Code Alert ICM and Voice-to-Voice Capabilities please call a Code Alert Representative at 800-669-9946 or visit us at www.rft.com.
