

CODE ALERT®

Senior Living Solutions

Wander Management Solutions

RFTECHNOLOGIES®

A secure environment is crucial to your residents

and their families. If your residents are at risk of Wander, keep them safe while reducing the risk of elopements, injuries and liability with the Code Alert® Wander Management Solution.

Discreet protection:
transmitters promote independence

Safe, Secure and Discreet

The Code Alert® Wander Management Solution safely monitors residents at risk of elopement with cost-effective transmitters that promote mobility and a home-like environment.

- Notifies caregivers of an attempted elopement for faster response time
- Fully supervised system alerts you of potential issues before an elopement occurs
- Barrier-free: visitors and staff can easily flow through a community
- Improves staff efficiency and quality of care with computer-based reports

How it Works

Residents and clients in senior living communities and adult day services wear transmitters around their wrist or ankle.

- Antenna recognizes when a transmitter is near to a monitored exit
- System arms the door and instantly notifies caregivers
- Alarm sounds if an attempt is made to open a locked door
- Caregivers are notified if a resident lingers near a monitored exit

Preserve Dignity with CodeWatch®

The wireless CodeWatch transmitter resembles a typical wristwatch* and is available in multiple, printed decorative faces.

- Colorful options help improve acceptance and preserve dignity
- Provides protection while maintaining a home-like environment
- Tamper-resistant, snap-closure banding available in nylon (blue) or durable PVC plastic (blue, gray or green)
- Water-resistant for use in showers

*Transmitter is not a working watch.

Discreet, dignified and restraint-free.

The Code Alert® Wander Management Solution conforms to UL Standard 294 for access control systems to ensure continuous, reliable operation.

Control Station

Easy-to-use software is accessible through a touchscreen monitor

CodeLock™

Secures door when a transmitter is detected in a monitored area, then unlocks out of range; nuisance timer helps prevent false alarms

DuoLink Antenna

Mounted near a monitored exit to read radio frequency signals from transmitters; LED blinks when a transmitter is within range

Paging System

Provides instant alarm notification to mobile staff via pagers

Cell & VoIP Phones

Instant email and text alerts are sent to mobile staff using cell and voice over IP (VoIP) phones

Quick Look™ Display

Discreet LED display shows resident name, location and event type

Touchpad Exit Controller (TEC)

Triggers an exit's lock and used to bypass or silence alarms; LEDs light up touchpad when pressed and turn off when inactive

Proximity Card Reader

Mounted at exit points, staff can easily bypass alarms by swiping key cards or badges

Staff Alert Panel

Audible and visual display of an alert, available in 8- or 32-zone models

Auxiliary Keypad

Control entry from the outside of an exit equipped with a TEC; models available for indoor and outdoor use

CodeWatch® Transmitters & Banding

Decorative transmitters are available in a variety of printed designs with multiple colored banding options; transmitters communicate with DuoLink door antennas

“One of the things that we appreciate most about the RF Technologies equipment is its reliability.”

– Randall M. Crosby, Director of Facilities, Milwaukee Jewish Home and Care Center

Alarm Notification for All Staff

Caregivers can receive alerts at a central computer station or a variety of mobile devices, including LED displays, pagers and walkie-talkies, to improve response times. Add alarm escalation to ensure every call gets a quick response.

Analyze and Save with Software Reporting

Code Alert software captures and stores alarm and event data to contribute to the overall workflow of your community.

- Near-door event reports help determine which residents are at a higher risk of elopement
- Help estimate costs based on level of care provided
- Monitor caregiver performance and response time through event data
- Spot trends to predict future behavior and improve staff efficiency

Complies With NFPA Codes

CodeLock™ door locking mechanisms comply with the National Fire Protection Agency's safety guidelines for delayed egress.

- Exit points automatically unlock in the event of a fire alarm
- Avoid false alarms: nuisance timer enables one to two seconds of pressure to be applied to a door before alarm sounds

Conforms to
UL Standard 294

Choose the Protection that Fits Your Community

Perimeter Alarm Security

The Model T30 solution is an “always armed” system, providing 24-hour exit monitoring.

- Non-PC-based: alarms when a door is opened
- Bypass alarms at exits with a security code

Transmitter-based Protection

Model T70 and T80 controllers use transmitters and antennas to detect a resident near an exit.

- Transmitters available with various battery lives that add flexibility to your community's needs
- Elevators deactivate to keep residents safe on their designated floor
- Escort feature enables residents to leave an area for a set time without sounding an alarm

Create a Comprehensive, Integrated Safety Solution

The Code Alert Wander Management Solution integrates with our other senior living solutions, helping you save on equipment costs and improve workflow by using the same server and notification devices.

- The community-wide Code Alert® Quick Response® Wireless Call Solution uses a variety of mobile and fixed call devices to ensure reliable and quick response for residents in need of assistance

- The Sensatec® Fall Management Solution integrates with Quick Response® Wireless Call Solutions to send an alert when a resident attempts to leave a bed or chair, reducing risk by alerting of a potential fall

Expert, In-house Service

You'll receive a complete suite of support services, available in-house from our experts in resident safety.

- Nationwide service teams deliver prompt, onsite support for peak performance
- Service agreements minimize unbudgeted expenses
- 24/7 technical support

Since 1987, RF Technologies has designed and delivered customizable, wireless safety and security solutions for the healthcare industry.
