

# Alarm Notification Devices

## Features

- Immediate notification to mobile communication devices
- Enables faster response time to residents/patients in need of assistance
- Increases staff, resident and patient satisfaction
- Reduces noise from alarms for a quieter environment
- Improve operational efficiency and staff productivity

## Additional Supported Devices

### Improve response times and quality of care

Integrate alerts and events from CODE ALERT® or SAFE PLACE® solutions with optional devices for efficient communication. Alerts are sent to a central computer station as a notification, and can be simultaneously forwarded to remote or mobile communication devices for a faster response.

- Improves staff mobility and increases resident/patient satisfaction
- Alarm escalation capability helps ensure alarms are answered
- Event routing increases efficiency during staff shortages

### Integrated event notification on one platform

Our unique connectivity solution allows staff to receive alerts through a variety of wireless communication devices on a single platform. The software contains messaging functionality that enables the system to message system events and information to the facility staff via the standard pagers, email, quick looks, or phone per the facility's needs.

- Wireless IP phones provide an easy method to make external calls for emergency services and facilitates collaboration among workers
- Mount Quick Look™ LED displays throughout a facility to reduce costs where workstations are not needed
- Classify an event cause at the point of care using a mobile handset\*, reducing the need to return to a computer station for each event
- Add wireless walkie-talkies for efficient staff-to-staff communication

### Reduce noise levels and alarm fatigue

Phones and pagers can be set to vibrate or softly chime to reduce alarm fatigue and comply with the current Centers for Medicare & Medicaid Services (CMS) guidelines for creating a home-like environment.
