

RFT CARES App

iOS Features

- Use with your existing Wi-Fi network¹
- iOS version works only with iPhones, iPads, and iPod Touch devices running the Apple iOS operating system v9.0 or v10 (and higher)²
- Available with CODE ALERT software v10.2 or later³

The RFT CARES® App lets caregivers receive, acknowledge and classify alarms

Description

The **RFT CARES** App for **CODE ALERT**® software lets caregivers conveniently receive alerts and scheduled events on their mobile devices. The ability to seamlessly view alerts, coordinate care and classify events “on the fly” improves workflow efficiency and level of care for your senior living community.

Multiple alerts or events are shown in the application’s queue, and caregivers can coordinate responses using the “*I Got It*” feature to claim alerts. Once resolved, alerts can be classified right from the app to track services delivered and trend alerts by resident over time.

In addition to running on mobile phones and tablets with Android v4.4 or higher, the app can be used with Android Wear. Visual alerts appear on the watch, along with the “I Got It” feature.

Because the RFT CARES App is Bring Your Own Device (BYOD) friendly, staff can download it onto their personal mobile device. Alerts are displayed while other applications are running.

Android Features

- Use with your existing Wi-Fi network¹
- Works with mobile phones and tablets running Android v4.4 and higher, as well as Android Wear²
- Available with CODE ALERT software v10.2 or later³

Compatible with Android Wear.
View and clear alarms directly from your wrist. Leave the phone in your pocket!
