

RF Technologies

Safety & Security Solutions

A History of Innovation

RF Technologies® is a leading provider of radio frequency identification (RFID) and real-time locating system (RTLS) safety and security solutions. Our sole focus is to develop **solutions that keep people safe** in the healthcare, hospitality and education markets in facilities throughout the U.S.

Our comprehensive and customizable solutions include more than 10,000 installations, as well as industry-leading brands such as:

- CODE ALERT® Senior Living Solutions
- SAFE PLACE® Patient Security Solutions
- SENSATEC® Fall Management Solutions
- HELP ALERT® Wireless Panic Alert System
- EXACTRACK® Equipment Location System

Dedicated to Keeping People Safe

An in-house group of experts dedicates their time exclusively to providing the latest in RFID and RTLS security and technology to help protect staff, patients, teachers, students and guests, and enhance staff and facility workflow.

- Engineering: Reliable products enhance safety and reduce liability
- Technical Support: 24/7 phone assistance
- Education: Focus more on care instead of learning a complex system
- Service: Nationwide teams deliver onsite support for peak performance

Setting the Standard

Our ongoing product and technological advancements have led the field since 1987. We were first in the industry to:

- Invent the first RFID solution designed for infant security
- Develop an elopement prevention solution for emergency departments
- Offer 24/7 technical phone support

CODE ALERT®

Senior Living Solutions

Resident safety solutions can be configured on a single software platform to create a customized solution that meets your individual community needs.

Wandering Management Solution

Residents at risk of elopement are monitored with small, lightweight transmitters that promote mobility and a home-like environment. Visitors and staff can easily flow through a community without barriers.

Wireless Call Solution

This community-wide, wireless emergency call system uses a variety of mobile and fixed call device options to ensure reliable and quick response for residents in need of assistance.

SAFE PLACE®

Patient Security Solutions

Integrate solutions onto a single platform, helping you save on equipment costs and improve workflow.

Infant & Pediatric Security Solution

Reduce the risk of abductions and associated liabilities with small, lightweight transmitters. Clinical Education options help train and support staff members before, during and after system launch.

Wandering Management Solution

Discreet transmitters keep patients safe and reduce one-to-one watches in behavioral health areas and memory care.

Wireless Staff Assist

Staff members can discreetly call for help with small, wireless pendants.

HELP ALERT®

Wireless Panic Alert System

Wireless Panic Alert System

Mobile panic alarms, or pendants, provide a proactive, cost-effective solution to protect staff, patients, teachers, students and guests. Pendants broadcast a silent alarm so staff can be located even if they're on the move.

EXACTRACK®

Equipment Location System

Equipment Location System

Small locators are attached to mobile assets, such as medical equipment or shared resources. Each locator is assigned a unique code, so system users can easily locate assets and review their status, helping save time and increase productivity.

SENSATEC®

Fall Management Solutions

Fall Management Solutions

A restraint-free monitoring system is available for patients and residents at risk for falls. Easy-to-use alarm units, with bed and chair sensor pads, integrate with nurse call systems for discreet, immediate notification.
