

Features

- Alerts staff of a potential fall
- For use with bed and chair sensor pads or floor mat sensor
- Audible alarm options can be customized based on patient fall risk level
- Restraint-free to respect patient dignity
- Integrated nurse call enables silent, local alarm

The Sensatec 700 Series Fall Management Solution is RF Technologies' most advanced and economical fall management solution. With numerous options available in a single alarm unit, staff training is quick and effective.

Custom, Reliable Fall Management

The ST750 can be used with bed and chair sensor pads or floor mat sensors to customize for each patient. Sensor options easily connect to the alarm unit, which automatically detects pad or floor mat mode. The ST750 alarm unit can easily hang or hook on beds, chairs, or wheelchairs. An optional wall hanger is also available for stationary use.

- Maintains compliance with CMS requirements for fall management alarms when integrated into your nurse call system
- An LED on the face of the device indicates system status
- Alarm units complete rigorous quality testing and have a 24-month warranty

Automated Alarm Unit

If a patient or resident starts to get up, your staff is notified instantly with an audible alert.

- Audible alarm options: choose from eight melodies or eight tones, with a 10-second voice recording
- Alarm delay can be set at zero, one, two, or four seconds
- Adjustable volume for different proximity to staff: Low, Medium or High
