

CODE ALERT®

COVID-19 CODE ALERT RAPID DEPLOYMENT NURSE CALL BUNDLE

ALTERNATE CARE SITES and FIELD HOSPITALS

Wireless Monitoring Solution

CHALLENGE

One of the complications related to the 2020 COVID-19 pandemic is the unprecedented surge of patients seeking care at hospital systems and medical facilities. In response to this rapid increase, States and municipalities are establishing alternate care sites (ACS) and field hospitals to help facilitate care to patients and alleviate the burden on over-capacitated hospitals and medical facilities.

With the rapid deployment of these temporary, nontraditional medical treatment areas comes the loss of a fully structured, functional, and wired healthcare infrastructure. These facilities aren't being set up with expert installation or wired systems in place that the traditional nurse call systems require.

OUR SOLUTION

RFT's Quick Response® Wireless Nurse Call Solution with enhanced CODE ALERT® software offers wireless call pendants that enable patients to summon help with the press of a button. The pendant can be worn around the neck or strapped to the wrist. When activated, care staff are alerted to the patient's location, thereby improving staff efficiency. The Quick Response® Wireless Nurse Call Solution gives patients peace of mind that they are able to call for help with the push of a button or the pull of a cord.

Easy-to-use software enhances staff efficiency and person-centered care. Our scalable solutions offer alternate care sites a cost-effective way to implement a wireless call solution. Systems are customizable to meet your needs and provide flexible alerting options and escalation paths to improve staff response times in these non-traditional environments.

NURSE CALL STARTER KIT

Easy-to-use software is accessible through a touchscreen monitor

WIRELESS CALL PENDANT KIT

20 Pendants and 5 Clearing Cards

WIRELESS PULL CORD STATION KIT

10 Pull Cord Stations

NURSE CALL STATION KIT

20 Jacks with 10 ft Call Cords

PAGING OPTION

Pager Base and Five (5) Pagers
and five (5) Body Gloves

COVID-19 CODE ALERT RAPID DEPLOYMENT

NURSE CALL BUNDLE - Limited Time Offer* To support the need to set up temporary hospitals and patient care areas due to the COVID-19 pandemic, we have developed special limited-time packages that enables facilities to quickly self-deploy the CODE ALERT Wireless Call System. This bundle can be catered to meet your facilities' needs.

COVID-19

SOLUTION COMPONENTS

Wireless Call Pendant

Worn as a necklace or on a belt clip; light blinks to show that a call has been received; water-resistant for safety in the shower. The pendant can be worn around the neck, strapped to the wrist or hooked on clothing.

Notification Station (Control Station)

Easy-to-use software is accessible through a touch-screen monitor.

Paging System

Instant alarm notification to mobile staff via pagers.

Nurse Call Station

Stationary nurse call devices for patient bedside and restrooms; LED confirms a call was placed.

Repeaters & Network Coordinator

Wireless calls (signals) are sent through Repeaters, to the Network Coordinator, to the Central Server.

FLAWLESS DEPLOYMENT PROCESS

How It Works

CODE ALERT platform provides end-to-end capabilities to meet facilities' needs. Patients can call for nurse assistance at the bedside using either pendants or call stations. When help is needed, alarms are sent directly to staff at the workstation and pagers with alarm information to assist staff to respond quickly. Staff can reset the alarm from the pendant or call station where it originated. CODE ALERT's reporting tool lets staff see specific events or a patient's call history. Reports show call volumes, response times and more.

Deployment

In order to meet the needs of this crisis, we have designed a simplified and remote implementation process that enables healthcare facilities to be fully operational on an accelerated schedule. CODE ALERT Wireless Emergency Call Solution is packaged and pre-programmed to arrive on site ready for a simple and quick self-installation and setup, supported remotely by RFT's Professional Technical Services team.

Pre-configuration of the CODE ALERT System and remote support during the setup process are included in the bundle.

This offering is not UL listed for use in hospitals. Due to the temporary nature in this crisis, buyer must confirm such standards and requirements are being waived.
