RFT is a turn-key manufacturer and provider of life safety solutions for the senior living, healthcare, education, and hospitality markets. With 11,000+ installations since their founding in 1987, RFT is a collaborative partner in designing custom-configured solutions that meet each customer's needs and reduce their liabilities. The RFT family of solutions includes CODE ALERT® nurse call, fall detection, and wander management, SAFE PLACE® patient, staff, and asset protection, HELP ALERT® staff duress, and SENSATEC® fall management products.

HELP ALERT!®

Staff Protection

Keeping people safe since 1987

Trusted **Safety**, Wherever You Need It

As workplace violence rises, safety should never escalate risk. The Help Alert Staff Protection badge allows staff to discreetly call for help without drawing attention. Indoors or outdoors, one push of a button delivers immediate, unnoticed assistance. We've crafted this solution with care, offering trust, reliability, and a commitment to your safety.

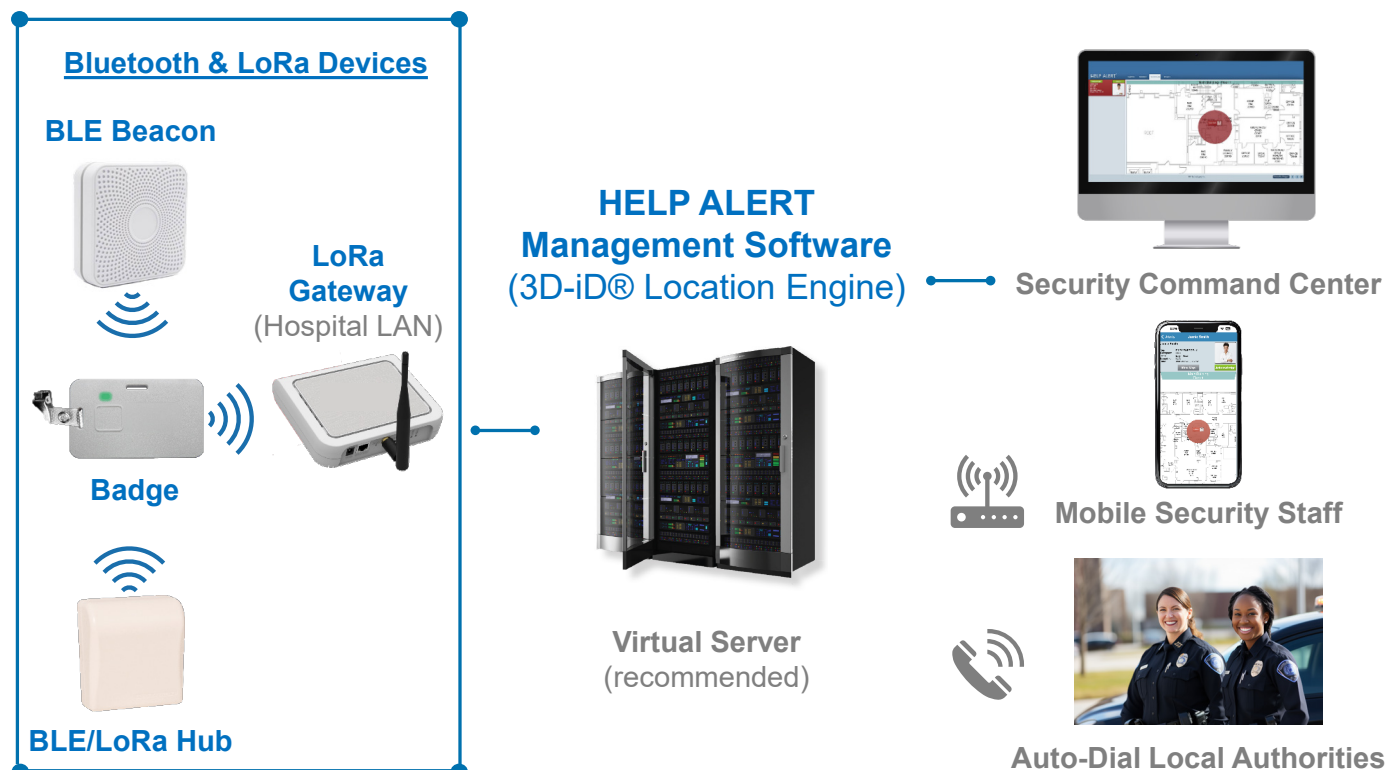

Thoughtful Design for Maximum Safety

The Help Alert badge is designed with both functionality and discretion in mind, ensuring that staff can request help without drawing unnecessary attention or escalating situations.

- **Discreet Design:** The compact, sleek design allows staff to call for help without alarming others or raising suspicion, making it an ideal solution for sensitive environments
- **Instant Feedback:** LED lights and gentle vibrations confirm that the call for help has been made, providing peace of mind that assistance is on the way.
- **Two-Way Communication:** Once help is on its way, the badge provides additional LED and vibration notifications, reassuring the user that their call has been acknowledged and help is en route.
- **Hygienic and Easy to Clean:** The simple, smooth surface of the badge makes it easy to clean, ensuring it meets health and safety standards in any environment.

How it Works

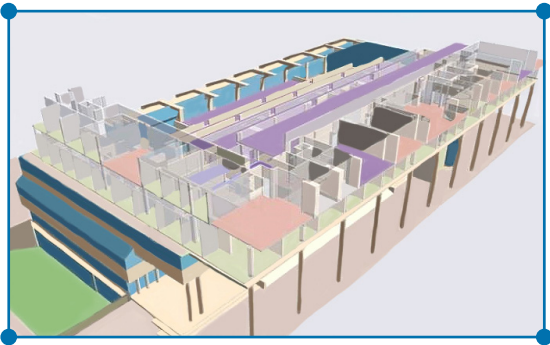

Comprehensive Staff Protection with Flexible, Standalone Software

The Help Alert Staff Protection software offers a flexible, browser-based system with an admin dashboard for real-time system health and reporting. It also supports integration with various third-party tools to enhance workplace safety.

- **Standalone Software:** No dedicated workstation and runs in the background.
- **Admin Dashboard:** Monitor system health, access analytics, and view reports easily.
- **Third-Party Integrations:** Compatible with Active Directory, IP cameras, access controls, and communication devices.
- **Flexible and Scalable:** Adaptable for various workplace safety environments.

3D-iD® Floor Mapping

Multi-Story Accuracy

Our proprietary 3D-iD location technology provides precise location in multi-story buildings.

Detection on the Move

Receive continuous device location from alert activation to alert resolution.

Innovative Positioning System

A virtual 2D model of the physical environment is constructed from 3D XYZ coordinates

Help Inside & Out

With the Help Alert Staff Protection badge, safety knows no boundaries. Whether your staff is working inside or outdoors, our system provides seamless coverage that ensures help is always just a button away.

- **Reliable Location Tracking:** From busy indoor spaces to wide-open outdoor areas, our advanced system delivers accurate location detection without the high costs or complex setup often required by other solutions.
- **Comprehensive Safety:** Whether moving between buildings, monitoring outdoor activities, or stationed inside, your staff can feel confident knowing that protection extends across your entire facility—wherever the job takes them.
