

# ONE PRESS TO PROTECT™

Because Every Moment Matters

## Empowering Staff Safety in Healthcare

Healthcare workers face increasing risks every day. The Help Alert Staff Panic Button gives them the power to call for help instantly, silently, and discreetly; with just one press.

Designed for nurses and frontline staff, our wearable badge provides tactile feedback and visual confirmation, so they know help is on the way.

With patented technology, Help Alert delivers unmatched indoor and outdoor coverage, ensuring protection from parking lots to patient rooms.

## Why Hospitals Choose Help Alert

### Wearable Panic Buttons

Combat workplace violence and create a safer environment. Hospitals using panic buttons report faster response times and improved staff retention.

### Complete Campus Coverage

From parking areas to patient floors, Help Alert protects staff everywhere.

### Real-Time Location Tracking

Our 3D-iD floor mapping pinpoints the exact location instantly for rapid intervention.

### Rapid Response

Every second counts. Help Alert ensures immediate action in critical situations.

### Security Integration

Seamlessly connects with security cameras and radios for enhanced monitoring.

### Discreet Design

Sleek, low-profile design that blends seamlessly with everyday attire, offering discreet protection without drawing attention.

### Silent Alerting

Badge functions as a silent alarm, ensuring no audible sound is made when activating it. This discreet feature allows staff to request help without drawing attention.

### Two-Way Communication

Providing instant feedback when help is on the way. With LED lights and gentle vibrations, staff are reassured that their call for assistance has been received and help is en route.

## Help Inside & Out

Healthcare workers face increasing risks in parking lots and garages. Help Alert's unique outdoor coverage and precise tracking provide peace of mind, wherever you are.

## Fast, Hassle-Free Installation

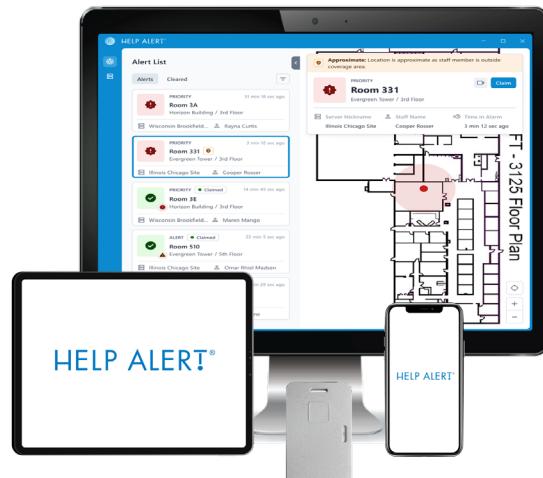

- Installation could be done in as little as one week
- No wire pulling, minimizing downtime and labor costs
- Transparent process, no hidden fees

## Secure & Reliable

Unlike Wi-Fi-dependent systems, Help Alert operates on a secure, independent network, reducing cybersecurity risks and simplifying management.
