

Quick Response® Plus UL 2560 Wall Mounted Call Stations

Features

- Wireless installation makes it easy to add or move devices as your facility needs change
- Call data can be sent to optional communication devices such as pagers, Quick Look™ LED displays and wireless phones
- Fully supervised system alerts you to low batteries and device failures
- Conforms to UL Standard 2560
- FCC Part 15 Compliant

The Quick Response® Plus Wireless Call stations feature a slim, discreet profile with a modern appearance that blends into the community for a home-like environment. A red LED provides visual confirmation that a call has been placed, giving residents peace of mind.

- The Push Button Call Station is frequently used in bathrooms and common areas. It has a high contrast visibility red button.
- The Nurse Call Cord Jack Call Station is frequently used at residents' bedsides and is compatible with standard 1/4-inch nurse call cords. The 90° side-angle connection helps prevent accidental removal; the device also sends an alert if the cord is removed.
- The Pull Cord Call Station is frequently used in resident rooms and common areas and has a "HELP" flag that appears when the cord is pulled.

Options

- Mounts anywhere; does not require separate surface-mount boxes or wall openings
- Push button and pull cord stations are water resistant and suitable for use near showers and tubs
- Optional check-in button records non-alarm events, such as resident or staff check-in, or a time log

Technical Specifications

Call Stations

Dimensions	4.8" H x 3.0" W x 0.9" D
