

Quick Response® Plus Fall Detection Pendant

Features

- Upon activation, provides tactile (vibrates) and visual feedback to the resident
- Call data can be sent to optional communication devices such as pagers, Quick Look™ LED displays and wireless phones
- Fully supervised system alerts you to low batteries and device failures
- FCC Part 15 Compliant
- Water resistant (IP67), can be worn in shower

The Quick Response® Plus Fall Detection pendant alerts caregivers immediately when a resident falls, even if the resident is unable to press the alarm button.

- Cloud processing provides visibility to fall event data across multiple properties, improving accuracy and performance.
- Provides greater mobility for residents as it can work both indoors and outdoors (depending upon configuration).
- The high contrast activation button is easy to find for residents while the button recess reduces false alarms.
- Alarms are cleared with a swipe of the clearance card.

Options

- Adjustable lanyard

Technical Specifications

Dimensions	1.6" H x 1.6" W x 0.5" D
Weight	0.6 oz
Color/Composition	Off white with gray button
Battery Life Expectancy	3.0 V coin cell lithium battery (CR 2032) 3 month typical battery life Internal, non-replacable battery lasts 3+ years
Frequency	902-928 MHz, Frequency Hopping Spread Spectrum
Check In	Every 60 minutes
Operating Temperature	32°-140°F, up to 90% relative humidity (non-condensing)

Necklace

adjustable nylon cord with
breakaway feature

Alarm Clearance Card
with retractable holder
